Water wise problem solving

Name: _____

Read the following. Show your working out to complete the problems.

1. If 5 litres of water is used every time a toilet is flushed, how many litres of water would be used if the toilet was flushed 3 times?

2. If your toilet uses 100 litres of water a day. How many litres of water does your toilet use in a week?

3. If your shower uses 400 litres of water a day. How many litres of water would it use in two days?

4. If your shower uses 300 litres of water a day, and your toilet uses 100 litres of water a day, what is the total amount of water used by the shower and toilet in a day?

5. If your school had 4 toilets and each one used 10 litres of water a day, how much water would be used altogether?
