

## About SUEZ

**SUEZ has 80,000 employees and activities across five continents.**

**In Australia, SUEZ supplies seven million people with drinking water and diverts 800,000 tonnes of waste from landfill every year.**

**With 850 collection vehicles and 100 operations across Australia, SUEZ's recycling and waste recovery division provides reliable collection, recycling and resource recovery services to more than 56,000 customers and more than 3.7 million residents every week.**

## Put your school's waste to good use

SUEZ knows that schools are committed to reducing waste and improving sustainability. SUEZ Recycling & Recovery also understands the challenges schools face in achieving this, so it works with staff and students to find smart and reliable solutions to collect, recover and recycle waste.

SUEZ's experience in waste management helps schools manage their diverse waste streams, reducing their environmental footprint.

To help you achieve your school's objectives, SUEZ will partner with you to provide tailored solutions that meet your specific requirements, providing training, signage and reporting options.

For example, SUEZ collaborated with Gleeson College in Golden Grove, Adelaide, to achieve a 96% diversion of waste from landfill. SUEZ identified various waste streams and developed a tailored waste management solution, including food waste recovery and composting, separating recyclables, and transforming general waste into an alternative fuel.

To find out how SUEZ can work with you to reduce waste and improve recycling at your school, phone: 13 13 35.
