

Letter maze

Name: _____

How to solve this puzzle:

- Find a letter that has an arrow leading from it. (Why not start with the 'N'?)
- Follow that arrow and write the letter you started with (N) in the box at the other end.
- Is there an arrow leading from that box? If yes, follow the arrow again and write the same letter (N) in the box at the end of that arrow.
- Repeat this process with that letter until you find a box that does not have an arrow leading from it.
- Choose a different letter and then repeat the process until all the boxes have a letter in them.
